## SPIN CONTROL: STI LAUNCHES THE ALL-NEW *TECH 4* SPORT QUAD TIRE LINE

**STI Tire & Wheel** is now providing a smart choice to sport quad riders and racers with the introduction of the all-new Tech 4. The STI Tech 4 brings high performance to the market at a **surprisingly affordable** price.

The Tech 4 debuts with two models specifically designed for either motocross or cross-country application. The **Tech 4 MX** is a track-oriented 4-ply tire available in two sizes: 20x6-10 front and 18x10-8 rear. The **Tech 4 XC** provides an extra level of trail durability with a 6-ply rating and comes in taller 21x7-10 front and 20x11-9 rear sizes.

Both models use a **high-tech rubber compound** that delivers exceptional hook-up on hardpack surfaces, in a **unique tread pattern** that pulls strongly through soft loam—a winning combination.

**Lightweight construction** reduces unsprung weight and rotational mass for unmatched acceleration and ride. The Tech 4's carcass is designed to reduce bounce and enhance high-speed control and cornering confidence.

Shop and compare—only the STI Tech 4 offers this degree of quality and performance at such a reasonable cost.

STI Tech 4 tires are available at finer ATV/UTV dealers everywhere, through MTA Distributing. For more
